One Health Surveillance includes the systematic collection, validation, analysis, interpretation of data to support decision making. However, a harmonized approach for One Health Surveillance (OHS) data annotation is currently missing.

## ORION PROJECT AIMS

1. Establishing and strengthening inter-institutional collaboration and transdisciplinary knowledge transfer in the area of surveillance data integration and interpretation.
2. Implement a prototype of an integrated strategy for long-term consolidation and harmonization of One Health Surveillance (OHS) solutions. ➔ „OHS harmonization framework“

## WORK PLAN (PROJECT DURATION: 2018-2020)

## PROJECT PARTNERS

BE Veterinary and Agrochemical Research Centre (CODA-CERVA)  
 BE Scientific Institute of Public Health (WIV-ISP)  
 DE German Federal Institute for Risk Assessment (BfR)  
 DE German Federal Research Institute for Animal Health (FLI)  
 DK Technical University of Denmark (DTU - FOOD)  
 DK Statens Serum Institut (SSI)  
 NL Wageningen Bioveterinary Research (WBVR)

NL National Institute for Public Health and the Environment (RIVM)  
 NO Norwegian Institute of Public Health (NIPH)  
 NO Norwegian Veterinary Institute (NVI)  
 SE Public Health Agency of Sweden (FoHM)  
 SE Swedish National Veterinary Institute (SVA)  
 UK Animal and Plant Health Agency (APHA)  
 UK Public Health England (PHE)
