British Antimicrobial Resistance in Fend Cattle Survey (BAmRCS): Standards contribution to national AMR surveillance SRUC 23 Veterinary Medicines Directorate

Madeleine K. Henry^{1*}, Gillian Maxwell¹, Catriona Webster¹, Judith Evans¹, Julie Stirling¹, Roger Humphry¹, Jude I. Eze¹, Maria Costa¹, Ian Hutchinson¹, Anju Kirby², Geoff Foster¹, Food Standards Scotland and Food Standards Agency Field Operations Teams, Sue C. Tongue¹ ¹SRUC (Scotland's Rural College), Inverness, Scotland, United Kingdom

²Veterinary Medicines Directorate, an Executive Agency of the UK Government Department for Environment, Food and Rural Affairs (Defra) *Correspondence: <u>madeleine.henry@sruc.ac.uk</u>

UK: Routine AMR monitoring in commensal & pathogenic bacteria

EU Harmonised Methods

Knowledge gap: healthy cattle entering the food chain

Acknowledgements With thanks to: the industry participants for permission to sample; the PATH-SAFE Programme for funding from HM Treasury's Shared Outcome Fund; Rachel Baird (FSA & PATH-SAFE) and Tamsin Dewe (VMD) for their facilitation and advice; the teams from Food Standards Agency (led by Rich Sharp) who carried out the sampling; the teams at AFBI-NI (Catherine Couzens & Philip Cassidy) and DAERA (Hilary Glasgow & David Kyle) who contributed to survey development; the APHA laboratory teams led by Catherine Fearnley, John Rodgers & Sam Connelly; TopSpeed Couriers and MicrobesNG; Scottish Government for funding, through its Veterinary Advisory Services Programme, for the SRUC Veterinary Services project monitoring AMR in healthy Scottish livestock through monthly abattoir surveys, Food Standards Scotland field staff for collection of those monthly survey samples; our SRUC colleagues including Jo Baughan, Shannon Proctor & Fiona Mackay.
